

Greensleeves
English folk song

It is good to imagine the sound of the fiddle to play this song. If you try to play in pure temperament, the harmony sounds vividly.

For the eight bars from the beginning, playing without vibrato may produce nice sound. The second player should try to be in perfect tune to make the chord along with the melody.

The harmony with the tremolo in the section C should be sound well and the melody should be played energetically. Play the counter-melody listening to the harmony.
